

Market consultation feedback on T2S user requirements and annexes

Additional comments, e.g. missing sections or suggested additional requirements

submitted by

Dresdner Kleinwort Investment Bank

Nbr	Topic	Comments	Suggested drafting	Confid. Y/N
2	static data input and maintenance	Various CSDS and issuer CSD's will be responsible for static data maintenance and having approval layers, my question would be, how will they keep consistency across varying inputs, there is no real specification of validation...OMGEO ALERT has a simillar concept and lack of validation has hindered the sucess of the product		16 N
3	Chapter 13 - canceling instructions after 20 days	what happens if you trade illiquid stocks, physical residuals etc they could easily go past 20 days		13 N
5	CSD participation	Will there be CSDs processing on commercial money platform and on T2S in parallel?		2 N
6	CSD participation	Will there be CSDs processing with Central Bank money on their own platform and T2S?		13 N
